What to Know Before You Choose

Material Pros & Cons

- Asphalt Shingles → Affordable, wide range of colors/styles, easy to repair. Lifespan ~20–30 years.
- Metal Roofing → Lasts 40–60 years, energy efficient, fire/rot resistant. Higher cost, cosmetic hail dents not covered.

Warranty Options

- Standard → 25–30 years, material defects only.
- Extended → Up to 50 years, covers materials & installation, transferable to next homeowner.

Hail Impact Ratings

- Class 3 → Withstands moderate hail, may reduce insurance premiums.
- Class 4 → Top impact rating, longest protection, often qualifies for biggest insurance savings.

James Hardie Siding Selection Overview

James Hardie Siding & Painting · Windows & Doors · Roofing & Gutters · Outdoor Living

Lap Siding Options

JamesHardie™

Board Width

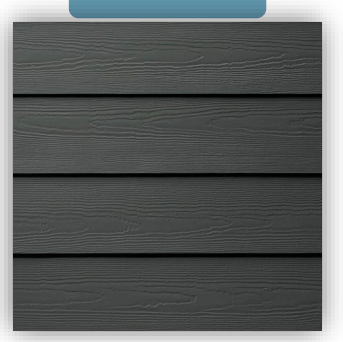
4¼ "	*5¼"*	*6¼"*	***7¼"***	***8¼"***	***9¼"***	***10¼"***	***11¼"***	***12¼"***

Exposure

Each board overlaps by 1¼". For example, an 8¼" board results in a 7" visible exposure.

Finish Options

Cedarmill



Smooth

Price Per Square (100 ft²):

8¼" Cedarmill = ***$1,050/sq***	*8¼" Smooth =* ***$1,100/sq***	*All other widths =* ***$1,150/sq***

Paneling & Board and Batten

Panel Type	Price Per Square (100ft^2)	OSB Requirement
Sierra 8 Panel	$1,500/sq	No
Board & Batten	$1,800/sq	Yes

Sierra 8 Panel

Board & Batten

Notes: Sierra 8 panels install quickly since they come in large sheets and don't require OSB backing or additional support strips. In contrast, Board & Batten siding needs vertical battens to cover the seams and must be installed over OSB or plywood sheathing for proper stability. While Sierra 8 offers a clean, simple look, Board & Batten provides a more traditional farmhouse style with deeper shadow lines.

Common Questions & Answers:

Most common product everyone uses?

8¼" Cedarmill

Most cost-efficient option?

8¼" Cedarmill

I want the farmhouse look

Board & Batten

Cheapest paneling option?

Sierra 8 Panel

I want durability, soundproofing, insulation

Add OSB (+$200/sq)

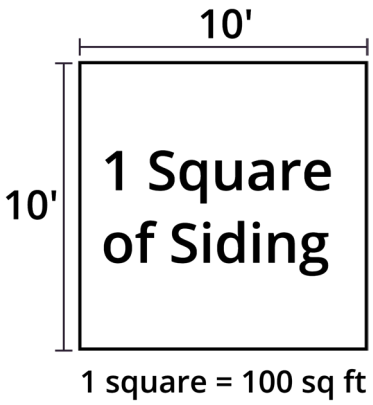
Additional Notes

ColorPlus® Products

- Factory-applied finish with baked-on color that resists fading, chipping, and cracking. While it delivers long-term durability and consistency, it's less common in Texas because:
  - Local labor and paint costs are lower, making on-site painting more cost-effective.
  - Crews here are skilled at matching the smooth, high-quality finish.
  - Homeowners often prefer flexibility to customize or repaint in the future.

What is a square?

- 1 square = 100 ft^2



James Hardie Features

- Durability – Engineered to resist warping, rotting, and swelling.
- Fire Resistance – Non-combustible fiber cement helps protect against fire hazards.
- Pest Resistance – Not attractive to termites or woodpeckers.
- Weather Protection – Designed for high winds, hail, and heavy rain.
- Low Maintenance – Holds paint longer than wood; fewer repaints needed.
- Design Versatility – Wide range of textures, profiles, and colors.
- Curb Appeal – Mimics the look of wood without the upkeep.
- Warranty – Strong manufacturer warranty (typically 30 years).ColorPlus® Technology Option – Factory-applied finish with fade resistance.
- Sustainability – Made from natural, sustainable raw materials.
